

IQ Project: Forest Road

This small courtyard space was fitted with IQ's minimal windows sliding doors, creating an external garden space in central London. The use of these slim framed doors allows the maximum amount of light into the narrow living areas. The sliding doors are configured to open in different formations ie, at the corner, bi parting to the centre and all sliding to one end in order to get maximum flexibility to the living areas.

About IQ Glass UK

IQ Glass UK are a UK based company specialising in all aspects of structural glazing including large glass sliding doors, structural glass, flush glazed windows and doors as well as bespoke and decorative glazing. For more information and images contact us.
