A CLEAR CHOICE

Even modern homes sometimes need an update. When this 335sqm new-build's original timber-framed windows didn't do the surrounding views justice, its owners swapped them for slimmer-framed glazing with aluminium-edged sliding doors and frameless fixed structural glazed panels from IQ Glass (01494 722 880; iqglassuk.com). Installing new windows and doors also helped to reduce the building's heating costs as the glass has improved weather, water and wind resistance, air permeability, and overall thermal performance.
