

The IQ Flush Drainage channel provides a robust and effective water protection and drainage for flush threshold base frame details. The hidden drainage channel can take up to 90 litres of water per minute.

Features

Step free threshold across drain, framing, internal and external floor

Open side entry allows water to drain from track into drainage channel

EPDM silicone sleeve connected to side entry point for extra water protection

Connects flawlessly with the drainage base of IQ's Sliding Glass Doors

Applications

For use with flush threshold framing systems such as sliding doors and pivoting doors.

Can be used as flush floor drainage for all external elements of a build

Drain Size

The flush threshold drainage channel is a total of 123mm deep x 70mm wide. The drainage channel can be cut and installed to any length

Materials

Tread grate Aluminium

Drainage channel High Density Polyethylene

Performance

Drainage Capacity 90 litres per minute

Anti Corrosion Guaranteed not to rust, corrode or stain in marine or chlorine environments

Colour

Aluminium tread grate finished as silver

Optional

Corner Connection Continuous aluminium tread 90 degree corner detail

Connector with EPDM seal and screw for channel length connection

End Cap with EPDM seal and screw

Spigot for connection to outlet drain

Construction and Installation

All installation to be carried out by IQ Glass in accordance with IQ Glass design drawings which are produced uniquely per project. Threshold drain needs to be connected to outlet using spigot by contractor.

See the IQ Flush Drainage channel at the showroom

If you or your clients would like to see the IQ Flush Drainage channel in person, you can at the IQ Glass showroom in Amersham. The Flush drainage channel is located at the entrance of Sky House (home to the IQ Glass showroom) in front of the entrance door leading to reception.

The IQ Flush Drainage channel is installed here so you can see the overall appearance in a real life installation and also see how the system efficiently operates in the wet UK climate.

To arrange a visit to the showroom contact your IQ sales representative who will be happy to offer you advice about this product and our systems while showing you around the showroom.

How to Specify the Flush Drainage Channel from IQ Glass

The IQ Flush Drainage Channel is exclusive to IQ Glass. If you would like to specify an IQ Flush Drainage Channel on your project just speak to the team at IQ who would be happy to assist.

Speak to the team at IQ

The team at IQ are the experts in our product range. If you are considering using an IQ Flush Drainage Channel product on your project speak to the team at IQ who will be able to advise you on the best solution for your intended design, ensure that all specification criteria are met and advise the feasibility to areas of the installation you may not have considered.

Get a Quotation

We advise our customers to get a quotation for their intended IQ Flush Drainage Channel installations from IQ. This allows us all to ensure that the preferred product and design is within budget. If it is not we can help you adjust the specification to reach all performance, design and budgetary requirements.

Add us to your NBS Specification

To assist you in specification we have created individual NBS Specification sheets for our products. These, easy to navigate, documents contain all the vital information needed for specification. They are available for you to complete on your own, alternatively ask your sales representative at IQ to complete this on your behalf

Place the Order

When ready you (or your client or the builder) can then place the order for your IQ Flush Drainage Channel with us as part of your glazing package. A full in-house handover will take place and your project will be passed to the contracts and design team. Once your project deposit is placed we will then undertake full design drawings for the installation and any other additional glazing works. Please allow at least 20 working days for the design process.

The project will be appointed a dedicated contracts manager who will oversee the installation process.

Where can I see the IQ Flush Drainage Channel product before order?

We have an IQ Flush Drainage Channel available to view at the entrance of our showroom in Amersham. The drainage channel has been installed in a purpose built structure, exposed to the environment and used on a day to day basis. This will enable you to see just how well the IQ Drainage channel withstands the wet British climate and how smoothly it operates.

If you or your clients would like to visit the showroom just contact us via telephone or email.
